

## ABOUT OUR PROJECT "YOUR HISTORY IS OUR HISTORY!"

Under the ERASMUS project 'Your History Is Our History!' we are going to make better teaching and learning conditions. In today's world, we can observe sudden and rapid changes therefore we are obliged to emphasize the importance of our roots, as well as our common European roots. Despite the ability of free travelling around the world, as a result of the difficult political situation, many religious wars and their refugees, we become "slaves" of our borders in order to become safe and sound. As consequences of these problems the young generation is afraid of other cultures and different religions. By exchanging experiences, making new friends, uncovering the unknown history, they will be able to place their nation in the European history and will become open-minded European citizens. The students will become the real creators of historical drama and workshops, making them active learners.

### AIMS

Our aims are to help young children widen their horizons and become more courageous in exploring new cultures and religions through travelling and discovering unknown European history. Our project goal is to consolidate family ties by involving the whole school community (also parents and grandparents) into all project enterprises. Using ICT tools during the lessons, will develop their skills in this area, what will be very helpful not only in school but also on the job market in their future. But the long term effects and the range of our activities will be highly valuable due to our implementations which will become popular in our local society through the media.
